Dear Colleagues,

The Digital Therapeutics industry is at another **pivotal point** in its history and there is arguably no greater time than since the field was founded for us to come together.

Whilst we have faced significant challenges over the previous few years, there have also been countless successes along the way. Many companies are delivering for patients with unmet medical needs, and it is now **more crucial than ever** for us to share how we succeeded or why we didn't as we build the future of validated digital healthcare together.

Enter DTx West 2025...

Since 2018, The DTx Series has been **the** meeting point for the industry, and I am personally delighted that this will continue. Over the years, significant deal-making, knowledge sharing and industry-defining conversations have taken place at DTx and DTx West 2025 is primed to **build upon this impact**.

Marrying the "old" with the "new," DTx West maintains the core principles and feel, whilst also evolving to ensure that it continues to **deliver for everyone in the industry**. The field is entering its next chapter, and so is The DTx Series. From the new reimbursement opportunities and changing business models through to updated evidence standards and clinical advancements, DTx West 2025 will ensure that all core topics are deciphered. Couple this with diverse representation from leadership positions across healthcare, the impact of this event will be felt for years to come.

And therefore, I invite you to join us on March 13-14, 2025 in San Diego, CA to help drive forward the **next generation of validated digital healthcare**.

I look forward to welcoming you!

Kind regards,

Jason Green

"I have attended the DTx West and East events since their inception. I have found that these events are more focused on the challenges, needs, successes, and opportunities for the digital health industry than any other industry events. It brings together digital health technology companies, health payers, pharmaceutical companies, healthcare providers, and other service providers that are helping to move the industry forward."
